SAFETY DATA SHEET

SECTION 1 / Identification

Product Name: Carving Wax
Product Numbers: 2617500, 2617510, 2617512, 2617514, 2617520, 2617522, 2617524, 2617530, 2617532, 2617534, 2617540, 2617542, 2617544, 2617550, 2617555, 2617560, 2617650, 2617660, 2617800, 2617805, 2617810, 2617815, 2617820, 2617825, 2617826, 2617830, 2617845, 2617846, 2617855, 2617860, 2617865, 2617880, 2617882, 2617886, 2617888, 2617892, 2617896, 2617898, 2617900, 2617910, 2617912, 2652330, 2652338, 2652339, 2652341, 2652345, 2652362, 2652363

Synonyms: Polyethylene; Ethylene Homopolymer; Ethene Polymer; Polyethylene Wax

1.2 Relevant identified uses of the substance or mixture and uses advised against
Plastic molding, film, laminating, coating.

Supplier Information
Paul H. Gesswein & Co., Inc.
201 Hancock Ave., Bridgeport, CT 06605
Phone: 203-366-5400, FAX: 203-366-3953
email: info@gesswein.com, www.gesswein.com
Emergency phone number: CHEMTELL - 800-255-3924

Section 2: Hazards Identification

EU/EEC
According to EU Directive 67/548/EEC (DSD) or 1999/45/EC (DPD)

2.1 Classification of the substance or mixture
CLP ☒ Not classified
DSD/DPD ☒ Not classified

2.2 Label Elements
CLP Hazard ☒ No label element(s) required
DSD/DPD Risk phrases ☒ No label element(s) required

2.3 Other Hazards
CLP ☒ May form combustible dust concentrations in air.
   According to Regulation (EC) No. 1272/2008 (CLP) this material is not considered hazardous.
DSD/DPD ☒ May form combustible dust concentrations in air.
   According to European Directive 1999/45/EC this material is not considered dangerous.

United States (US)
According to OSHA 29 CFR 1910.1200 HCS

2.1 Classification of the substance or mixture
OSHA HCS 2012

2.2 Label elements
OSHA HCS 2012 Hazard statements
- Not classified

2.3 Other hazards
OSHA HCS 2012
- No label element(s) required

Canada

According to WHMIS

2.1 Classification of the substance or mixture
WHMIS
- Not classified

2.2 Label elements
WHMIS
- No label element(s) required.

2.3 Other hazards
WHMIS
- May form combustible dust concentrations in air.
  In Canada, the product mentioned above is not considered hazardous under the Workplace Hazardous Materials Information System (WHMIS).

See Section 12 for Ecological Information.

Section 3 - Composition/Information on Ingredients

3.1 Substances

<table>
<thead>
<tr>

</table>

3.2 Mixtures
- Material does not meet the criteria of a mixture in accordance with Regulation (EC) No 1272/2008.

Section 4 - First Aid Measures

4.1 Description of first aid measures

Inhalation
- IF INHALED: If breathing is difficult, remove victim to fresh air and keep at rest in a position comfortable for breathing. Give artificial respiration if victim is not breathing. If signs/symptoms continue, get medical attention.

Skin
- For thermal burns, flush or submerge effected area in cold water to dissipate heat. Cover with clean bandage material. Do not peel material from skin. Get medical attention. For contact at ambient temperatures, wash with soap and water.

Eye
- If dust or molten material contacts the eye, immediately flush with plenty of water for at least 15 minutes. If irritation persists, get medical attention immediately.

Ingestion
- First aid is not expected to be necessary if material is used under ordinary conditions and as recommended.

4.2 Most important symptoms and effects, both acute and delayed
- Refer to Section 11 - Toxicological Information.
4.3 Indication of any immediate medical attention and special treatment needed

Notes to Physician

- Burns should be treated as thermal burns. The material will come off as healing occurs; therefore, immediate removal from the skin is not necessary.

Section 5 - Firefighting Measures

5.1 Extinguishing media

Suitable Extinguishing Media

- Water fog, dry chemical, foam, carbon dioxide.

Unsuitable Extinguishing Media

- None known.

5.2 Special hazards arising from the substance or mixture

Unusual Fire and Explosion Hazards

- Avoid generating dust; fine dust dispersed in air in sufficient concentrations, and in the presence of an ignition source is a potential dust explosion hazard.

Hazardous Combustion Products

- Carbon dioxide, carbon monoxide, formaldehyde, acetaldehyde, irritating smoke.

5.3 Advice for firefighters

- Wear positive pressure self-contained breathing apparatus (SCBA). Structural firefighters’ protective clothing will only provide limited protection.

Section 6 - Accidental Release Measures

6.1 Personal precautions, protective equipment and emergency procedures

Personal Precautions

- Do not walk through spilled material. Do not breathe dust. Avoid contact with skin and eyes. Wear appropriate personal protective equipment, avoid direct contact.

Emergency Procedures

- Contain spill and monitor for excessive dust accumulation. Avoid unnecessary personnel and equipment traffic in the spill area. Ventilate closed spaces before entering.

6.2 Environmental precautions

- No special environmental precautions necessary.

6.3 Methods and material for containment and cleaning up

Containment/Clean-up Measures

- Avoid generating dust.
- Use clean nonsparking tools to collect material.
- Dust deposits should not be allowed to accumulate on surfaces, as these may form an explosive mixture if they are released into the atmosphere in sufficient concentration.

6.4 Reference to other sections

- Refer to Section 8 - Exposure Controls/Personal Protection and Section 13 - Disposal Considerations.

Section 7 - Handling and Storage

7.1 Precautions for safe handling

Handling

- Avoid contact with molten material; do not breathe fumes, vapors, dust or sprays from molten or burning material. When processing at > 600°F (315°C), consider use of a respirator to avoid breathing decomposition products.
- Do not use in areas without adequate ventilation. Minimize dust generation and accumulation. Routine housekeeping should be instituted to ensure that dusts do not accumulate on surfaces. Dry powders can build static electricity charges when subjected to the friction of transfer and mixing operations. Provide adequate precautions, such as electrical grounding and bonding, or inert atmospheres.
- Use appropriate Personal Protective Equipment (PPE) Avoid contact with skin and eyes. Do not breathe dust. Wash thoroughly with soap and water after handling and before eating, drinking, or using tobacco.
7.2 Conditions for safe storage, including any incompatibilities

Storage
- Keep container closed and in ventilated area, away from ignition sources, heat, open flames, and direct sunlight. Do not store with incompatible materials.

7.3 Specific end use(s)

- Refer to Section 1.2 - Relevant identified uses

7.4 Other Information

- For prevention of fire and explosion, keep from contact with incompatible materials. Minimize dust generation and accumulation. Because product may accumulate a static charge, use proper bonding and/or grounding procedures prior to transfer. In the United States of America, refer to NFPA® Pamphlet No. 654, "Prevention of Fire and Dust Explosions from the Manufacturing, Processing, and Handling of Combustible Particulate Solids, 2006 edition."

Section 8 - Exposure Controls/Personal Protection

8.1 Control parameters

Exposure Limits/Guidelines
- No applicable exposure limits available for product or components.

8.2 Exposure controls

Engineering Measures/Controls
- Good general ventilation (typically 10 air changes per hour) should be used. Ventilation rates should be matched to conditions. Supplementary local exhaust ventilation, closed systems, or respiratory and eye protection may be needed in special circumstances; such as poorly ventilated spaces, very hot processing, evaporation of liquids from large surfaces, spraying of mists, mechanical generation of dusts, drying of solids, etc.

Personal Protective Equipment

Respiratory
- For limited exposure use an N95 dust mask. For prolonged exposure use an air-purifying respirator with high efficiency particulate air (HEPA) filters. Follow the OSHA respirator regulations found in 29 CFR 1910.134 or European Standard EN 149. Use a NIOSH/MSHA or European Standard EN 149 approved respirator if exposure limits are exceeded or symptoms are experienced.

Eye/Face
- Wear safety goggles.

Hands
- Wear thermally resistant gloves and long sleeves when handling molten product.

Skin/Body
- Wear long sleeves and/or protective coveralls.

Environmental Exposure Controls
- Follow best practice for site management and disposal of waste.

Section 9 - Physical and Chemical Properties

### 9.2 Other Information
- No additional physical and chemical parameters noted.

## Section 10: Stability and Reactivity

### 10.1 Reactivity
- No dangerous reaction known under conditions of normal use.

### 10.2 Chemical stability
- Stable under normal temperatures and pressures.

### 10.3 Possibility of hazardous reactions
- Hazardous polymerization not indicated.

### 10.4 Conditions to avoid
- Heat, sparks, open flame.

### 10.5 Incompatible materials
- Strong oxidizing agents, fluorine.

### 10.6 Hazardous decomposition products
- No data available

<td>Disorders of the lungs.</td>
</tr>
</tbody>
</table>

**Potential Health Effects**

**Inhalation**

Acute (Immediate) • Exposure to dust may cause irritation. Processes such as cutting, grinding, crushing, or impact may result in generation of excessive amounts of airborne dusts in the workplace. Nuisance dust may affect the lungs but reactions are typically reversible.

Chronic (Delayed) • Prolonged exposure to the dust may cause wheezing, chest tightness, productive cough nasal irritation and symptoms of chronic respiratory disease.

**Skin**

Acute (Immediate) • Exposure to dust may cause mechanical irritation.

Chronic (Delayed) • No data available.

**Eye**

Acute (Immediate) • Exposure to dust may cause mechanical irritation. Excessive concentrations of nuisance dust in the workplace may reduce visibility and may cause unpleasant deposits in eyes.

Chronic (Delayed) • No data available.

**Ingestion**

Acute (Immediate) • Excessive concentrations of nuisance dust in the workplace may cause mechanical irritation to mucous membranes.

Chronic (Delayed) • No data available.

14.6 Special precautions for user

- None known.

14.7 Transport in bulk according to Annex II of MARPOL 73/78 and the IBC Code

- Not relevant.

## Section 15 - Regulatory Information

### 15.1 Safety, health and environmental regulations/legislation specific for the substance or mixture

- **SARA Hazard Classifications**
  - None

- **Inventories**
  - These products comply with the following inventories:
    - Australia AICS
    - Canada DSL/NDSL
    - China
    - EU EINECS/ELNICS
    - Japan ENCS
    - Korea KECL
    - New Zealand
    - Philippines PICCS
    - USA TSCA

- **California Prop 65**
  - In compliance, no reportable substances

- **CERCLA**
  - In the event of a spill, the end user should verify whether reporting is required under local, state, and/or federal regulations.

- **CONEG**
  - These products are in compliance with the heavy metals requirements of the Coalition of Northeastern Governors and California Toxics in Packaging Prevention Act (AB2021).

- **Ozone Depleting Substances**
  - In compliance with 40 CFR 82, no reportable substances.

- **RCRA**
  - In the form delivered by Westlake, these products are not considered as hazardous waste, and are not subject to reporting under the Resource Conservation and Recovery Act.

### 15.2 Chemical Safety Assessment

- No Chemical Safety Assessment has been carried out.

## Section 16 - Other Information

- **Last Revision Date**: 10/February/2015
- **Preparation Date**: 21/January/2014
