

## Included in the Kit:

- 1 Rinse Station**  
Holds the rinse buckets, and has flip lids for easy one-handed operation.
- 2 Rinse Buckets**  
Two large buckets to be partially filled with isopropyl alcohol (IPA).
- 3 Rinse Basket**  
Transfer parts from one bucket to the next with one hand. The basket can rest on the edge of the rinse bucket to allow your parts to drip.
- 4 Rinse Bottle**  
Keep fresh IPA for rinsing prints and cleaning internal channels.
- 5 Finishing Tray**  
Provides a catch-all workspace for resin or IPA drips, and a place to rest sticky parts and tools.
- 6 Tweezers**  
Use to carefully remove unwanted cured material from the resin tank.
- 7 Scraper**  
Can be used to remove parts from the build platform as well as carefully cleaning and inspecting the resin tank for cured material.
- 8 Removal Tool**  
Apply pressure under the base generated by PreForm to release the base of your parts from the build platform.
- 9 Jig**  
Provides a place to secure the build platform as you work on removing your print.
- 10 Flush Cutters**  
Use to carefully remove support tips from your prints.
- 11 Disposable Nitrile Gloves**  
Wear gloves when removing and finishing your prints.
- 12 Tank Tool (not shown)**  
Custom two-part scraper and tweezer. Remove individual pieces of cured resin from the tank with the tank tool.
